Hello all,

Attached is the agenda for our November 1-2 Eco Team work session in Portland. We'll start at 10:00 a.m. sharp on Tuesday, and end at 4:30 p.m. on Wednesday. Please review the agenda and **carve out a couple of hours before our meeting** on Tuesday to do the "prior to our meeting" homework assignments noted here. This will help us move forward efficiently in our discussions.

<<11.1-2.05.Eco Team Meeting agenda.doc>>

The focus of our meeting will be on continuing to discuss the ERA approach and beginning to prioritize data needs. In addition, we'll take a small amount of time to move forward on whether to develop management objectives for the ERA. We all acknowledged that management objectives could be beneficial for many reasons, and I think our decisions on this could affect our prioritization of data needs. Thus, please **keep an eye out for an email from Chris** today with background information, and take an hour or so to review this and note your thoughts before Tuesday's meeting.

Also, please review the attached notes from this week's Eco Team meeting, particularly as they relate to our discussion of assessing sturgeon, Chinook and lamprey, and as they relate to management objectives. (**this is one of your assignments**)

<<10.24-25.05.Eco Team notes.doc>>

Finally, please review the attached Data Needs Table and note what priority you would give to each data need, using the definitions provided in our November 1-2 agenda. (**this is another assignment**)

Again, thanks everyone for your continued great work on this. Have a good weekend, and I'll look forward to seeing you next week.

Cheers,
Mikell
